Profile

Full-Stack Web Developer with 5+ years of professional experience building scalable, high-performance web applications using JavaScript, TypeScript, Vue.js, React.js, and modern front-end frameworks. Proven track record of integrating complex REST/GraphQL APIs, improving web performance, and deploying production-ready solutions across diverse industries. Currently pursuing an MSc in Automotive Software Engineering at Technische Universität Chemnitz, Germany, with a growing specialisation in AI/LLM integration and intelligent system development. Skilled at collaborating cross-functionally with designers, backend engineers, and QA teams to deliver exceptional digital products on time and within scope.

PROFESSIONAL EXPERIENCE

Oct 2023 – Feb 2026
Dhaka, Bangladesh

Therap (BD) Ltd.
Web Developer

- Designed and maintained responsive, high-performance web interfaces for enterprise-grade healthcare software, improving cross-browser compatibility.
- Developed and customised Salesforce Lightning components and WordPress solutions, reducing third-party integration errors.
- Optimised web performance, SEO, and cross-device responsiveness, reducing average page load time.
- Partnered with UX designers and backend engineers to deliver pixel-perfect, WCAG 2.1-accessible front-end implementations, meeting all sprint deadlines.

Feb 2021 – Jun 2023
Dhaka, Bangladesh

Jatri Services Limited
Frontend Web Developer

- Engineered and delivered scalable, responsive web applications using Vue.js, Nuxt.js, and TypeScript.
- Integrated GraphQL and REST APIs to enable real-time data exchange, reducing average API response time and improving overall data load efficiency.
- Architected and implemented a reusable, modular UI component library, reducing front-end development time and standardising patterns across the codebase.
- Led the full development lifecycle from initial design to production deployment, maintaining code quality with consistent CI/CD practices.

SKILLS

Programming Language
JavaScript, TypeScript, Python

Front-End Frameworks & Libraries
Vue.js, React.js, Nuxt.js, GSAP, AOS, jQuery

Web Design & UI Development
HTML5, CSS3, Tailwind CSS, Bootstrap

CRM/CMS
Salesforce Lightening, WordPress

Version Control & CI/CD
Git, GitHub, GitLab, CI/CD, Vite, Webpack

Project Management Tool
Agile, Scrum, Jira, ClickUp, Trello, Slack

API & Testing Tools
FastAPI, REST API Integration, GraphQL, Postman

AI / LLM Engineering
LLM, RAG, Agentic AI workflows

Backend & Database
Node.js, PostgreSQL, MySQL, SQL, Docker

EDUCATION

04/2026 – Present
Chemnitz, Germany

MSc in Automotive Software Engineering (Expected Apr 2026)
Technische Universität Chemnitz
Advanced graduate program focusing on intelligent software systems, embedded development, and AI-driven automotive solutions. Key areas of study include: Software Architecture for Automotive Systems | Machine Learning & AI Applications | Autonomous Driving Technologies | Model-Based Development | Real-Time Systems | Functional Safety (ISO 26262)

02/2017 – 12/2020
Dhaka, Bangladesh

B.Sc. in Computer Science and Engineering
Southeast University
AI | Algorithm | Data Structure | Database | Numerical Methods | Data Mining | Information & Software Development | Calculus | Linear Algebra | Computer Graphics

PROJECTS

Therap Connect
Showcase and informational website for a smart data collection platform
Role: Web Developer
Technologies: GSAP, JQuery, JavaScript, Tailwind CSS, AOS
Key Responsibilities:
- Developed the complete frontend website in collaboration with web designers.
- Implemented smooth, interactive animations using GSAP for an engaging user experience.
- Ensured fully responsiveness and cross-browser compatibility across all devices.

Jatri Ticket
Online ticketing platform for bus and launch services
Role: Front-End Developer
Technologies: Vue.js, Nuxt.js, Tailwind CSS,
Key Responsibilities:
- Designed and implemented the frontend UI for the bus ticketing module.
- Integrated REST APIs for dynamic data, including routes, bus availability, seat selection, and ticketing.
- Ensured cross-browser compatibility, responsiveness, and a user-friendly design.

Modern React Dashboard
Dashboard developed from a Figma design
Role: Front-End Developer
Technologies: React.js, Tailwind CSS, Packages(Theme switcher, chart)
Key responsibilities:
- Developed a modern dashboard based on a Figma design
- Ensured a pixel-perfect design matching the original UI specifications.
- Implemented a theme switcher to toggle between light and dark modes, and interactive charts.
